AGENDA

- Goal
- What is the Launcher?
- Demo

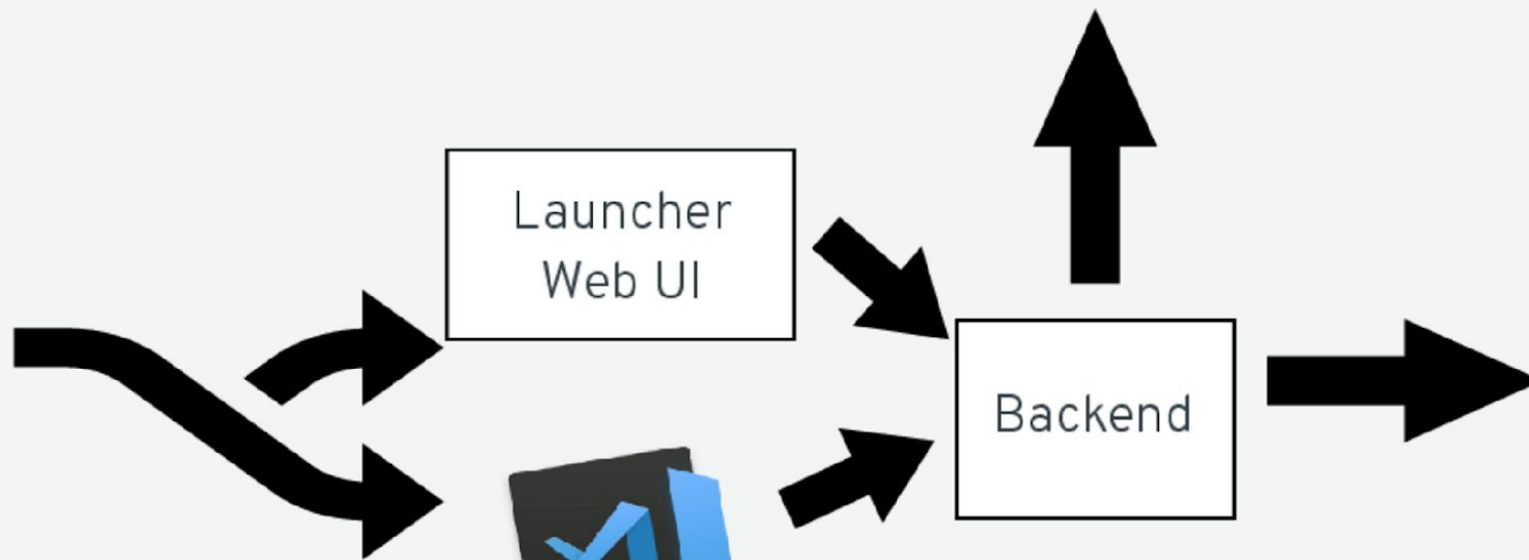

GOAL

Move into the OpenShift Brand and make Launcher part of OpenShift Commons

WHAT IS THE LAUNCHER?

- A system which enables application developers to use OpenShift to quickly create, build, and deploy applications
- Enhance the experience
 - Relieve Application Developers from the responsibility of learning OpenShift/Kubernetes constructs
 - Single story for application creation, build and deployment.
 - OpenShift Console
 - OpenShift.io
 - IDE plugins (Che, VSCode, Eclipse IDE)
 - Unified flow for application creation on OpenShift no matter the runtime
